

Proposed User Guide

Attention Dapsone 7.5% Gel Users

Please read the following mentioned important message regarding the handling and working of Dapsone Gel Pump

1. The round translucent plastic membrane on pump opening is NOT a seal and NOT required to be altered or removed.
2. For proper functioning of pump, the plastic membrane must remain intact, or the pump will not function properly
3. Ensure the complete pump stroke and allow approximately 5 seconds between pump strokes while priming the pump.
4. It may take several strokes before the pump is fully primed.

If you encounter issues when using the product, you can contact Viona Drug Safety at 1-888-304-5011.
